

## Environmental Knowledge and Policy Innovation between East and West

### Lessons Learned and not?

Minsk, 28-30 May 2019

---

### **Panel 6. Energy transitions between the West and the East**

*chaired by Prof. Aleh Cherp, Lund University, Sweden*

Energy transitions are long-term structural changes in energy systems, which are shaped by economic, technological and political factors. All of these factors have international dimensions, e.g. international trade in energy resources and equipment, technology and policy diffusion. How do energy transitions in the East and the West mutually influence each other?
